

### Compatible UL Listed Fire Alarm Control Panels

*Bosch Security Systems, Inc. makes no claim either written, verbal, or implied that any specific, individual FACP will work with the C900V2 Network Dialer Capture Module. Per NFPA Standard 72 requirements, communications from each and every actuating device must be successfully tested from the actuating device to the fire alarm supervising station at the time of installation, and after any change in the configuration of the FACP.*

*The UL Listed Fire Alarm Control Panels (FACPs) listed in Table 1 on page 2, are proven to be compatible with the C900V2 Network Dialer Capture Module and the D6600 Receiver/Gateway under the method required by Underwriters Laboratories (UL).*

*FACPs that are not UL Listed as compatible should not be used with the C900V2. Adding UL Listed FACPs to this list is easy for Bosch Security Systems to do. If the FACP you wish to use with the C900V2 is not in Table 1, contact Technical Support at (800) 289-0096.*
