Rainbow Casino

is a hotel casino located in Vicksburg, Mississippi. With more than 35,000 square feet of gaming action, Rainbow Casino is a long-standing favorite with locals and tourists alike. The casino is well known for having the latest and hottest games available. With over 900 machines, the choices are many and they pay-outs are plenty! The hotel's 82 rooms and seven suites are comfortable and spacious and offer all the amenities visitors expect in today's quality hotels.

Business Objective:

At Rainbow Casino, a criminal was repeatedly preying on vulnerable adults. The culprit had evaded authorities for months, cheating victims of cash, bank cards, PINs and checks. Conventional cameras did not effectively and consistently capture the license plate information that was needed on a 24/7 basis to identify suspicious vehicles and prevent them from entering the casino property if required.

Solution:

Bosch REG License Plate Capture cameras provide effective plate capture day and night and are the most versatile cameras of their kind available today. They "get the plate" of every vehicle entering and exiting Rainbow Casino.

U.S. patented Bosch REG License Plate Capture cameras operate under any ambient lighting condition, ranging from total darkness to direct glare from sunlight and high-beam headlights at speeds up to 100 miles per hour. At Rainbow Casino, the cameras use Ambient Rejection technology to overcome difficult speed and lighting conditions that previously made reliable capture impossible.

With usable images of license plates, casino operators now know which vehicles are coming and going from their parking lots. The Bosch REG License Plate Capture cameras have improved security at the Rainbow Casino, and help operators to keep unwanted visitors off casino property. They provide effective vehicle surveillance and assist with vehicle access control.

REG License Plate Capture cameras show plate images at Rainbow Casino.

Solving a problem that had previously frustrated local authorities, Bosch REG License Plate Capture cameras provided clear images, real-time capture and irrefutable evidence to help police convict the criminal preying on senior citizens at the casino.

Result:

Cooperating with the Mississippi Office of the Attorney General, Rainbow Casino delivered a clear license plate and vehicle image, which led to the arrest of the criminal. The accused pleaded guilty to the charges and received a jail term of several years.

"The authorities were after this person for months, but she always found ways to escape the law. The Bosch REG License Plate Capture cameras delivered police the evidence they needed to put this criminal away," said system installer, Michael Stark of Bluff City Electronics.
